

SCHOOL OF INFORMATICS

INDIANA UNIVERSITY
IUPUI

Indiana University School of Informatics, IUPUI

Lecturer / Sr. Lecturer Faculty Position in Health Information Administration

The Indiana University School of Informatics (Sol) at Indiana University Purdue University Indianapolis (IUPUI) invites applicants for a Lecturer appointment in Health Information Administration Program.

The responsibilities of the position include teaching within the health information administration program, develop courses for both the traditional class setting and for distance education; assist the program director in setting goals and developing curricula; engage in scholarly activity on a continual basis; serve as a member of the School of Informatics committees; maintain current knowledge in the Health Information Management profession through active participation in professional organizations; share in interviewing, evaluating and advising students; and serve on professional committees.

The IUPUI campus, with over 30,000 students, is located on a large tract of land adjacent to downtown Indianapolis. Sol was founded 10 years ago and is the first completely new school in the United States devoted exclusively to Informatics and a range of sub-disciplines. Sol offers three Ph.D. programs (Health Informatics, Bioinformatics, and Human-Computer Interaction), four Master's programs (Health Informatics, Bioinformatics, Human-Computer Interaction, and Media Arts & Science), and three Baccalaureate programs (Informatics, Health Information Administration, and Media Arts & Science). Nearly 1,000 students are enrolled in the school's programs, with Sol faculty and students enjoying state-of-the art facilities, including fully equipped classrooms, laboratories and offices in its brand new building. For information on the Indiana University School of Informatics, IUPUI, please see <http://www.informatics.iupui.edu>.

Sol is situated on the academic Medical Center Campus, home to the Indiana University School of Medicine, the second largest medical school in the US. During the FY 2009-10, the IUPUI campus was awarded \$400.34M for funded research, much of it in health and life science. Sol collaborates with the Regenstrief Institute, an internationally recognized informatics and healthcare research organization that has pioneered electronic medical records, computerized provider order entry, clinical decision support, regional health networks, and many of the data standards that drive them.

Sol also enjoys collaborative partnerships with the Roudebush VA Medical Center, Clarian Health (one of the largest health care organizations in the Midwest), the School of Nursing, as well as the Purdue Schools of Engineering and Technology and Science. In June 2009, *The Economist* stated, "Although every state wants to be a hub for life science, Indiana really is one." Indiana's comprehensive strengths and leadership in health and health information technology are promoted by BioCrossroads, a statewide initiative, which partners with research institutions, global companies, philanthropic organizations and government to advance growth and innovation.

Requirements for this appointment include a Masters level degree in a field related to Health Information Administration. The ideal candidate will possess a minimum of three years of experience in the Health Information Management field with at least one year of management experience; advanced level computer literacy, including extensive knowledge in Microsoft Office and software applications typically used in health information management departments; and experience with coding, HIPAA and Release of Information.

For additional information about the Indiana University School of Informatics, including degrees, course descriptions, plans of study and faculty research, please see <http://www.informatics.iupui.edu>.

Electronically submit a statement on your philosophy of teaching, curriculum vita, cover letter explaining your interest in this position, and names and contact information of three references to:
